

- 3600 Meter Service Ceiling
- Vibration-Dampened Mounting Plate
- 32,000-48,000 MAH Power

Carrier H6 Electric

The Harris Aerial Carrier H6 Electric is a Blue UAS 2.0 certified platform that delivers on exceptional endurance and stability. Designed in Central Florida, the Carrier H6 Electric now comes with a lighter, quick release battery pack. This platform is also modular and easily convertible from fully-electric power format to EFI Hybrid-Electric or Hydrogen-Gas power formats. Custom integration? No Problem. Harris Aerial has partnered with every major sensor provider, and has custom payload integration services available upon request.

GCS Options

As our Carrier models cater to different needs so do our GCS solutions. Whether your needs dictate the use of a rugged 19" GCS or something more portable like our brand new hand held 8" GCS, the Atlas. HereLink Blue/Black options are also available (Non-NDAA 848 Compliant).

Harris C-GCS
